## CABLE TERMINATION

To establish both physical and electrical connections between the cable and the terminal of the equipment, junction, or another cable, thereby enabling the smooth flow of electricity in the desired manner.

## CABLE MANAGEMENT

To describe the way cabling is routed, organized, and supported. This involves organizing your cabling and connectivity hardware in a way that makes it easy to identify components and troubleshoot problems. This makes future upgrades and repairs easier while keeping your IT spaces professional.

## SWITCHGEAR

Including electrical disconnect switches, fuses or circuit breakers used to control, protect and isolate electrical equipment. Switchgear is used both to de-energize equipment to allow work to be done and to clear faults downstream.

# RMACO PTY LTD

## INDUSTRIAL CABLES

Designed and manufactured for use in industrial settings such as Industrial Automation, Metals, Manufacturing, Military, Utility, Transit, and other heavy-duty industries and applications.

## CONDUIT, FITTINGS & ACCESSORIES

Connecting conduit to other conduit or to an electrical box. They are available in various metals and with different levels of moisture protection. Products include cast outlet boxes, conduit fittings, and cable sealing fittings for hazardous (classified) locations.

## ENCLOSURES

Ideal for containing sensitive pieces of equipment. Enclosures and junction boxes are implemented in applications where sensitive equipment or connection points need a higher level of protection. You will commonly find them in engine rooms and electrical rooms.
